Dear Mr. Hilsenbeck:

Per our conversation this morning, the facility listed above has been sold to the McDonnell Douglas Corporation, St. Louis, Missouri, back in July 1984. We notified your Department of this change in ownership in July 1984 and again in July 1985.

We have just received your October 22, 1986 letter which outlines our obligation to comply with the RCRA Generator Quarterly Reporting Procedures for the State of Missouri for this facility.

Please note in your records that GMC Electro-Motive Division has not owned or operated this facility as of July 1984. This facility's identification number status should be addressed to the McDonnell Douglas Corporation to see if it is still required. Please remove our name and mailing address from your mailing list for any environmental regulatory reasons.

If there are any questions please feel free to contact me at 312-387-5904.

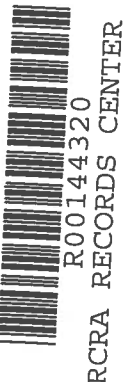

Very truly yours,

October 22, 1986

Dear Generator:

RE: NEW GENERATOR QUARTERLY REPORTING PROCEDURES

The Missouri Department of Natural Resources, Waste Management Program, has implemented new procedures which affect the method of reporting to the department hazardous waste shipments to off-site facilities. Previously, only completed copies of the hazardous waste manifest document were sent to the department on a quarterly basis. The new method requires that the generator also complete a Generator's Hazardous Waste Quarterly Report using form DNR HWG-11, Parts 1 and 2. Both the completed forms and the appropriate copy for all hazardous waste manifests used for off-site shipments must now be transmitted to the department.

Exempt from the new reporting method are generators of exclusively waste oil who have a viable contract with a waste oil transporter and who sign the transporter's daily log sheet in lieu of initiating a hazardous waste manifest. Generators who generate both waste oil and other types of hazardous waste are required to report all hazardous waste including the waste oil (if the transporter's waste oil daily log was NOT signed) using the new report.

It is IMPORTANT to note that the first quarterly report which your generating facility completes will cover the period of July 1, 1986 through September 30, 1986. Please complete the enclosed forms which describes the activity of your facility during this period. If you have previously submitted hazardous waste documents for July 1 through September 30, please attach a note to the quarterly report.

This quarterly report is due November 14, 1986. Future reports will be due within forty-five days of the end of each quarter.

Enclosed you will find one each of form HWG-11, Parts 1 and 2, and instructions for their completion. Before filling out the forms, please make additional photocopies as you see necessary.

Should you have questions concerning the new reporting system please contact me by writing to the above address or calling at (314) 751-5402.

Sincerely,

DIVISION OF ENVIRONMENTAL QUALITY

Kurt Hilsenbeck

ACKNOWLEDGEMENT OF APPLICATION FOR A HAZARDOUS WASTE PERMIT

This is to acknowledge that the Environmental Protection Agency has received:
(1) A notification pursuant to Section 3010 of the Resource Conservation and Recovery Act for the facility located at the address shown in the box below, and (2) Part A of a Hazardous Waste Permit Application for that facility, including a signed statement that the operation of the facility, or its construction, began prior to November 19, 1980. While the information provided by these submissions has not been fully reviewed for completeness or accuracy, EPA will accept this information as an initial qualification for interim status pursuant to Section 3005 of the Act. If after further review of this information, EPA determines that the owner or operator did not fulfill all the requirements for interim status, EPA may treat the owner or operator as not having qualified for interim status pursuant to that section and will advise the owner or operator of that determination. Facility owners and operators with interim status must comply with the standards set forth at 40 CFR Part 265 until a permit is issued. Interim status may be terminated if the owner or operator fails to furnish any additional information requested by EPA in order to process a permit application.
